

About NMHCA-NMCAL

We encourage you to become part of NMHCA-NMCAL's educational events by submitting a presentation for consideration.

The New Mexico Health Care Association (NMHCA) - New Mexico Center for Assisted Living (NMCAL) is proud to represent more than 100 nursing facilities, assisted living communities, and intermediate care facilities for the mentally retarded. NMHCA has worked hard, since its establishment in 1954, to advance the profession of long-term care through information, education, leadership, and advocacy.

Fulfilling the continuing education needs of the many professional disciplines affiliated with providers of long-term health care services is an essential service provided to NMHCA's membership. In today's dynamic professional environment, NMHCA has endeavored to identify, develop, and offer a wide variety of innovative and relevant educational opportunities that truly satisfy the educational needs of our members and their staffs.

NMHCA offers 3 major events each year! Our Leadership Symposium is held in Santa Fe in either February or March to coincide with the legislative session. This conference is targeted to the leaders in long term care in New Mexico and attracts more than 150 each year. The Convention and Exposition is offered every August and is the largest long term care event in New Mexico attracting more than 300 attendees that represent every discipline in long term care. The Fall Conference is held in November in the southern part of New Mexico.

Please accept our invitation to become part of these dynamic events by submitting a presentation for consideration. Our educational offerings promise great exposure for you and your company. We represent nearly every segment of the long-term care profession including small independent operators, large national chains, proprietary and philanthropic nursing homes, assisted living communities, and ICFs/MR. We strive to put together and energetic and well-timed educational programs to appeal to our diverse audience and make their learning experience the best it can be.
